Education

SRM Institute of Science & Technology, Chennai, India

Sep 2021 – Jun 2025

Bachelor of Technology in Computer Science

Technical Skills

Python, Pandas, NumPy, Scikit-learn, Machine Learning, Matplotlib, Seaborn, Power BI

Experience

Associate Test Engineer

Mar'25 – Present

EY GDS

Chennai, India

- Developed automation solutions using Java and Selenium WebDriver, reducing manual testing effort and improving release quality.
- Performed end-to-end validation, defect analysis, and system testing for enterprise applications in Agile development environments.

Research Intern

Jun'23 – Jul'23

Indian Meteorological Department

Pune, India

- Collaborated with senior researchers to optimize rainfall forecasting algorithms, reducing misinterpretation of critical atmospheric data by over by 20%
- Performed detailed analyses on vast amounts of atmospheric data highlighted during the internship, providing findings that corrected inaccuracies observed in previous rainfall forecasts shared with senior researchers.

Projects

Real-Time System Monitor | *Rust, Axum, Tokio, Sysinfo, Docker, GitHub, Render*

GitHub Link

- Developed a real-time system monitoring dashboard in **Rust** using the Axum web framework and Tokio asynchronous runtime.
- Built REST API endpoints to monitor CPU, memory, disk, network, uptime, and system information using the **sysinfo** crate.
- Designed a responsive web dashboard with live system metrics, light/dark theme support, containerized the application using Docker, and deployed it on Render.

Applications of Unsupervised Machine Learning Techniques and

Clustering Analysis | *Python, NetCDF Data*

GitHub Link

- Utilized unsupervised machine learning and clustering techniques to analyze rainfall data, identifying key trends and improving weather forecasting accuracy.
- Collaborated with Dr. Rajib Chattopadhyay (Scientist E) and Senior Research Fellow Ms. Lekshmi to enhance rainfall forecasting algorithms, contributing to a 20% reduction in the misinterpretation of critical atmospheric data.
- Developed data analysis and machine learning workflows using Python, Pandas, NumPy, and Scikit-learn.

Positions of Responsibility

Aaruush (National Level Techno-Management Fest) | *Committee Head, External Affairs*

- Synchronized logistics and managed guest accommodation planning for participants across multiple events, ensuring smooth execution at various venues.
- Coordinated with cross-functional teams and on-ground crews to streamline schedules, resolve last-minute issues, and deliver a seamless event experience.

Social Club | *Head of Operations Domain, Directorate of Student Affairs*

- Coordinated on-ground support for school outreach programs, managing student flow, activity setup, and safety.
- Assisted in organizing sports, art, and awareness activities for visiting children, ensuring smooth and engaging experiences.
